TRANSACTIONS OF THE OBSTETRICAL SOCIETY OF LONDON. VOL. XIV.

1873

the pedagogy of creativity represents a groundbreaking study linking the pedagogy of classroom creativity with psychoanalytical theories taking a classroom based example of poststructuralist methodology as its starting point anna herbert s investigation explores the relationship between creativity seen in psychological activity such as dreams and creativity seen in the classroom asking the following questions what might a methodology which taps into different forms of creativity look like could such a methodology support current neuropsychological theories of memory and learning what are the consequences of imaginary and symbolic orders of knowledge for the understanding of both conscious and unconscious creativity in the classroom exploring the ideas of a number of psychological analysts including jacques lacan s four discourses concepts of the other and the theories of poststructuralist thinkers including levinas mead and kristeva herbert explains how different theories can be used to develop creativity in the classroom and surmount obstacles preventing creative environments clearly presenting both theoretical positions and their bearing on classroom practice teachers at all levels will benefit from this innovative approach to creativity as will school psychologists and all professionals interested in the links between psychoanalysis and pedagogy herbert clearly communicates both theoretical positions and their bearing on classroom practice teacher at all levels will benefit from this innovative approach to creativity as will school psychologists and other professionals interested in the links between psychoanalysis and pedagogy

Krieg und Literatur/War and Literature Vol. XIV, 2008

2009-10-28

this volume is a collection of new published and revised essays providing a distinctive thoroughgoing realist approach to contemporary psychological theories concepts methods and applications the essays also offer critical analyses of antirealist trends both in and outside of mainstream psychology

The Pedagogy of Creativity

2010-02-25

in this volume michael balint who over the years made a sustained and brilliant contribution to the theory and technique of psychoanalysis develops the concept of the basic fault in the bio psychology structure of every individual involving in varying degree both mind and body balint traces the origins of the basic fault to the early formative period during which serious discrepancies arise between the needs of the individual and the care and nurture available these discrepancies create a kind of deficiency state on the basis of this concept balint assumes the existence of a specific area of the mind in which all the processes have an exclusively two person structure consisting of the individual and the individual s primary object its dynamic force originating from the basic fault has the overwhelming aim of putting things right this area is contrasted with two others the area of the oedipus complex which has essentially a triangular structure comprising the individual and two of his objects and whose characteristic dynamism has the form of a conflict and the area of creation in which there are no objects in the proper sense and whose characteristic force is the urge to create to produce

Realism and Psychology

2010-12-17

sigmund freud s discovery of psychoanalysis explores links between freud s development of his thinking and theory and his personal emotional journey it follows his early career as a medical student researcher and neurologist and then as a psychotherapist to focus on the critical period 1895 1900 during these years freud submitted himself to the process that has become known as his self analysis and developed the core of his psychoanalytic theory drawing on freud s letters to his friend and confidant wilhelm fliess and on selected psychoanalytic writings in particular his dream of irma s injection paul schimmel formulates psychoanalytic dimensions to the biographical facts of freud s life in 1900 freud wrote that he was not a thinker but a conquistador in reality he was both and was engaged in a lifelong emotional struggle to bring these contradictory sides of his personality into relationship his psychoanalytic discoveries are conceptualized in the context of his need to achieve integration within his psyche and in particular to forge a more creative collaboration between conquistador and thinker sigmund freud s discovery of psychoanalysis will be of interest to psychoanalysts psychoanalytic psychotherapists academics and teachers of psychoanalysis and to all serious students of the mind

four articles cover archival practices at a small liberal arts college repatriation of sacred objects emergence of the african art collection at the kreeger museum and exhibit creation process at the rockefeller archive center

The Evolution of Psychological Theory

2017-09-29

psychoanalysis and cognitive psychology a formalization of freud s earliest theory is an attempt to translate psychoanalytic theory into a computer model a model psychoanalysts will accept as accurately mirroring freud s theory while at the same time satisfying the demands made upon any formal model within contemporary psychology given the vast extent and the continued development of psychoanalytic theory the present study focuses on freud s earliest theory in a sense this limitation is a natural one anyone really wishing to come to grips with psychoanalytic theory will listen to freud s advice and follow the path he himself took in his earliest theory the theory of abreaction freud lays the foundation for all of his later work here for the first time we encounter concepts psychical conflict repression unconscious ideas the principle of constancy which have proved decisive for the development of psychoanalytic theory moreover this was the period during which freud himself was obsessed by the idea of representing his theory in a single coherent model much as in natural science the present monograph may be regarded as a belated effort to realize the ideal that freud had in mind in his project for a scientific psychology a psychology in which psychical processes are represented in such a manner that they become perspicuous and free from contradiction

the fight against ark is on in earnest when ark member ivy sends her spirits to attack goryo and ebisu meanwhile muhyo and gang attempt the impossible by trying to fuse a book of magic law with the writ of passage will they succeed before ark destroys them viz media

J.R. McCulloch

2013-10-16

in this book originally published in 1963 dr fine sets out to describe what freud said and to re evaluate his views critically in the light of the best knowledge of the time freud's numerous changes of view his constant searching for the truth wherever it might lead him as well as his resolute adherence to certain hard won positions once he had achieved them are all skilfully traced freud's intellectual odyssey is divided into four periods from 1886 to 1895 he was a neurologist investigating hysteria and other nervous disorders then came his self analysis from 1896 to 1899 the real matrix from which psycho analysis grew the first psycho analytic system of psychology was developed in the period from 1900 to 1914 the remainder of his life from 1914 to 1939 was devoted to the elaboration of ego psychology and heart of contemporary psycho analysis dr fine undertook in writing this book the formidable task of examining the whole body of freud's thought to clarify what he said and to review his ideas critically in the light of the best available existing knowledge as he says in this process of criticism i have tried to specify which aspects of freud have stood the test of time and which have not so far as i can see no one has ever before taken the trouble to ask what did freud actually say how does what freud said stand up in terms of what we now know in answering these questions dr fine develops a major thesis that all modern psycho analysis derives from freud though it has moved far in many different directions the contention is that emphasis on schools is misleading and has obscured the actual historical growth of the science as he states in his preface to this volume dr fine's conviction is by building on freud's fundamental insights we can move on most readily to empirical research and thus construct a more satisfactory science of psychology

YuYu Hakusho, Vol. 14

2014-01-21

this book offers an in depth study of the poetics of creative writing as a subject in the dramatically changing context of practice as research taking into account the importance of the subjectivity of the writer as researcher it explores creative writing and theory while offering critical antecedents theoretical directions and creative interchanges the book narrows the focus on psychoanalysis

particularly with regard to lacan and creative practice and demonstrates that creative writing is research in its own right the poetics at stake neither denotes the study or the techniques of poetry but rather the means by which writers formulate and discuss attitudes to their work

Classification from Antiquity to Modern Times

2017-09-11

in the freudian reading lis moller examines the premises procedures and objectives of psychoanalytic reading in order to question the kind of knowledge such readings produce but above all she questions the role of freud as master explicator

A History of Modern Psychology

2018-11-08

collective violence changes the perpetrators the victims and the societies in which it occurs it targets the body the psyche and the socio cultural order how do people come to terms with these tragic events and how are cultures affected by massive outbreaks of violence this book is a groundbreaking collection of essays by anthropologists psychologists and psychoanalysts drawing on field research in many different parts of the world profiting from an interdisciplinary dialogue the authors provide provocative at times deeply troubling insights into the darker side of humanity and they also propose new ways of understanding the terrible things that people are capable of doing to each other

Muhyo & Roji's Bureau of Supernatural Investigation, Vol. 14

2014-01-21

remorse or rather the lack of it frequently features in banner headlines but there is little systematic study of this important interdisciplinary topic whose relevance has extensive social ramifications the complex relationship between remorse shame guilt and attempts at reparation are discussed in this authoritative work this volume is the first comprehensive attempt to bring together both forensic clinicians and those working within the criminal justice system new life familiar though they are in literature religion and philosophy the phenomena of remorse and reparation are rarely explored in either the theory or practice of forensic psychotherapy this book begins to address those omissions dealing with clinical and legal questions and ranging widely over political philosophical sociological and artistic perspectives remorse and reparation is very much the expression of murray cox s particular and unique talent he would have been proud of this his last book even though he did not live long enough to supervise its publication murray has brought together authors from different disciplines to convey a myriad of views although occasionally contradictory the impacts of original insights presented from several different perspectives can be stunning this book will be a valuable addition to the literature of any forensic institution british journal of psychiatry this is a book all magistrates probation officers and qpmms should read it consists of 15 short and mostly readable essays looking at a little considered aspect of human experience from medical legal sociological and philosophical points of view the case studies quoted are very much to the point two essays particularly impressed me david tidmarsh now of the parole board was formerly on the staff of broadmoor hospital he draws attention to the lack of reference to remorse in the board s remit which is concerned only with risk john harding of the inner london probation service quotes examples including two well known ones from barlinnie where moral reformation has occurred newsletter of quakers in criminal justice remorse or rather the lack of it frequently features in banner headlines but there is little systematic study of this important inter disciplinary topic whose relevance has extensive social ramifications should a show of remorse by an offender be taken into account in sentencing is there a correlation between the experience of remorse and a diminished likelihood of re offending and is there a correlation between the experience and the expression of remorse such questions and the complex relationship between remorse shame guilt and attempts at reparation are discussed in this authoritative work this volume is the first comprehensive attempt to bring together both forensic clinicians and those working within the criminal justice system there is also a series of chapters by those writing from the adjacent complementary disciplines of moral philosophy classics shakespeare studies sociology and anthropology

Freud (RLE: Freud)

2013-10-08

almost a million people die by suicide every year who estimate the sheer numbers have made suicide prevention a major health target but effective prevention is not straightforward suicide is a complex event more complex than most of us imagine calling for an equally complex response psychotherapy with suicidal people provides a multi component approach with rich clinical data including many case histories to guide the reader based on decades of research from across the globe antoon a leenaars takes the reader into the mind of the suicidal person from the young to the elderly from the anonymous to the famous there is no better way to know and thus to treat a person a plethora of special features makes this volume an international classic and includes reflections of many suicidologists such as heraclitus plato sigmund freud emile durkheim and edwin shneidman a unique window on the clinical mind of the author empirically supported definition with applications across age gender historical time as well as culture the report of the international working group on ethical and legal issues in suicidology psychotherapy with suicidal people a person centred approach is essential reading for clinical psychologists psychiatrists and their trainees and all clinicians who work with suicidal people

Towards a Poetics of Creative Writing

2015

exploration of erotic transference and counter transference in therapy with particular attention given to the female therapist male client relationship draws on lacan and jung to analyse examples from clinical practice and client s art

The Freudian Reading

1991

the handbook of narcissism and narcissistic personality disorder is the definitive resource for empirically sound information on narcissism for researchers students and clinicians at a time when this personality disorder has become a particularly relevant area of interest this unique work deepens understanding of how narcissistic behavior influences behavior and impedes progress in the worlds of work relationships and politics endfragment

The Saturday Review of Politics, Literature, Science, Art, and Finance

1862

what happens in our unconscious minds when we listen to produce or perform popular music the unconscious a much misunderstood concept from philosophy and psychology works through human subjects as we produce music and can be traced through the music we engage with through a new collaboration between music theorist and philosopher smith and overy present the long history of the unconscious and its related concepts working systematically through philosophers such as schopenhauer and nietzsche psychoanalysts such as freud and lacan to theorists such as deleuze and kristeva the theories offered are vital to follow the psychological complexity of popular music demonstrated through close readings of individual songs albums artists genres and popular music practices among countless artists listening to the unconscious draws from prince to sufjan stevens from robyn to xiu xiu from joanna newsom to arcade fire from pj harvey to lcd sound system each of whom offer exciting inroads into the fascinating worlds of our unconscious musical minds and in return theories of the unconscious can perhaps takes us deeper into the heart of popular music

Landscape Illustrations of the Waverley Novels.

1831

mysterium coniunctionis was first published in the collected works of c g jung in 1963 for this second edition of the work numerous corrections and revisions have been made in cross references to other volumes of the collected works now available and likewise in the bibliography mysterium coniunctionis was jung s last work of book length and gives a final account of his lengthy researches in alchemy it was jung s empirical discovery that certain key problems of modern man were prefigures in what t he alchemists called their art or process jung maintained that the world of alchemical symbols does not belong to the rubbish heap of the past but stands in a very real and living relationship to our most recent discoveries concerning the psychology of the unconscious the volume includes ten plates a bibliography an index and an appendix of original latin and greek texts quoted in the
