Understanding and Interpreting Texts. "The Hobbit" by J.R.R. Tolkien (Englisch 10. Klasse Realschule)

2017-06-12

lesson plan from the year 2017 in the subject didactics for the subject english pedagogy literature studies grade 1 7 university of augsburg language english abstract the lesson described in this paper is based on the book the hobbit by j r r tolkien the lesson is intended for a year 10 class in a grammar school the recipients of the lesson will therefore be 14 to 17 year old pupils the fantasy novel the hobbit was chosen for several reasons the book was originally written for children which means that it contains relatively easy vocabulary and is fun to read at the same time pupils are likely to enjoy this book as it is set in a fictional world that is lovingly described and is packed with action as the protagonists have to survive many exciting adventures furthermore j r r tolkien is listed in the syllabus for realschulen as an author that could be discussed in year 10 as the pupils at grammar school are the same age should have similar competences and most likely have similar interests as

pupils in a realschule the book should be appropriate for grammar school pupils too the lesson described in this paper would be the first of about eight lessons on the book and would be 45 minutes long the main focus of the lesson is set on reading comprehension and so the overall goal of the lesson is for the pupils to be capable of summarising the first two chapters of the hobbit in their own words as well as being able to reflect on the novel this goal is based on the syllabus for english in grammar schools in year 10 the aims of reading comprehension that should be attained by the end of year 10 are described here among other things pupils should be able to read long and complicated literary texts and understand them on their own this is expected of the pupils in the lesson on the hobbit as the homework due for the lesson is to read the first two chapters of the hobbit on their own in the section on understanding texts there is a passage stating that pupils in year 10 should read either a novel or a drama of the twentieth or twenty first century and understand interpret and give their own opinion on the text isb 2004 the novel the hobbit fits into the category of novels from the twentieth century as it was published in 1937 tolkien 1997 and in the course of the lesson will be understanding interpreting and giving their own opinion on the text

this book repairs and revives the theory of knowledge research program of russell s principia era chapter 1 introduction and overview explains the program s agenda inspired by the non fregean logicism of principia mathematica it endorses the revolution within mathematics presenting it as a study of relations the synthetic a priori logic of principia is the essence of philosophy considered as a science which exposes the dogmatism about abstract particulars and metaphysical necessities that create prisons that fetter the mind incipient in the problems of philosophy the program s acquaintance epistemology embraced a multiple relation theory of belief it reached an impasse in 1913 having been itself retrofitted with abstract particular logical forms to address problems of direction and compositionality with its acquaintance epistemology in limbo scientific method in philosophy became the sequel to problems chapter 2 explains russell s feeling intellectually dishonest wittgenstein s demand that logic exclude nonsense belief played no role the 1919 neutral monist era ensued but russell found no epistemology for the logic essential to philosophy repairing chapters 4 6 solve the impasse reviving chapters 3 and 7 vigorously defend the facts about principia studies of modality and entailment are viable while principia remains a universal logic above the civil wars of the metaphysicians

Literature's Children

2019-02-21

literature s children offers a new way of thinking about how literature for children functions didactically it analyzes the nature of the practical critical activity which the child reader carries out emphasizing what the child does to the text rather than what he or she receives from it through close readings of a range of works for children which have shaped our understanding of what children s literature entails including works by isaac watts john newbery kate greenaway e nesbit kenneth grahame j r r tolkien and malcolm saville it demonstrates how the critical child resists the processes of idealization in operation in and through such texts bringing into dialogue ideas from literary theory and the philosophy of education drawing in particular on the work

of the philosopher john dewey it provides a compelling new account of the complex relations between literary aesthetics and literary didacticism

how language began revolutionizes our understanding of the one tool that has allowed us to become the lords of the planet mankind has a distinct advantage over other terrestrial species we talk to one another but how did we acquire the most advanced form of communication on earth

daniel l everett a bombshell linguist and instant folk hero tom wolfe harper s provides in this sweeping history a comprehensive examination of the evolutionary story of language from the earliest speaking attempts by hominids to the more than seven thousand languages that exist today although fossil hunters and linguists have brought us closer to unearthing the true origins of language daniel everett s discoveries have upended the contemporary linguistic world reverberating far beyond academic circles while conducting field research in the amazonian rainforest everett came across an age old language nestled amongst a tribe of hunter gatherers challenging long standing principles in the field everett now builds on the theory that language was not intrinsic to our species in order to truly understand its origins a more interdisciplinary approach is needed one that accounts as much for our propensity for culture as it does our biological makeup language began everett theorizes with homo erectus who catalyzed words through culturally invented symbols early humans as their brains grew larger incorporated gestures and voice intonations to communicate all of which built on each other for 60 000 generations tracing crucial shifts and developments across the ages everett breaks down every component of speech from harnessing control of more than a hundred respiratory muscles in the larynx and diaphragm to mastering the use of the tongue moving on from biology to execution everett explores why elements such as grammar and storytelling are not nearly as critical to language as one might suspect in the book s final section cultural evolution of language everett takes the ever debated language gap to task delving into the chasm that separates us from the animals he approaches the subject from various disciplines including anthropology neuroscience and archaeology to reveal that it was social complexity as well as cultural physiological and neurological superiority that allowed humans with our clawless hands breakable bones and soft skin to become the apex predator how language began ultimately explains what we know what we d like to know and what we likely never will know about how humans went from mere communication to language based on nearly forty years of fieldwork everett debunks long held theories by some of history s greatest thinkers from plato to chomsky the result is an invaluable study of what makes us human

Does life have meaning, purpose and value? Can we know whether God exists? If he does, why does he allow bad things to happen? How can we make sense of death and what lies beyond it? And how can we live life well during a personal, national or global crisis? Human beings have always asked these big questions. However, crises like the COVID-19 pandemic, the 2007-2008 financial collapse or the war on terror following the 9/11 attacks make them seem more urgent and harder to avoid. This short book is an accessible introduction to these questions. It makes no assumptions about the reader's beliefs but is written for anyone who wants to understand how Christian ideas can help make sense of life and live it well during difficult times. Each chapter is illustrated with examples from the lives of a wide range of people over time as well as stories from films, novels and music to help the reader think through these weighty issues in an engaging way.

political philosophy is nothing other than looking at things political under the aspect of eternity this book invites us to look philosophically at political things in j r r tolkien s legendarium demonstrating that tolkien s potent mythology can be brought into rich fruitful dialogue with works of political philosophy and political theology as different as plato s timaeus aquinas de regno hobbes s leviathan and erik peterson s monotheism as a political problem it concludes that a political reading of tolkien s work is most luminous when conducted by the harmonious lights of fides et ratio as found in the thought of thomas aquinas a broad study of tolkien and the political is especially pertinent in that the legendarium operates on two levels as a popular mythology it is in the author s own words a really long story that would hold the attention of readers amuse them delight them and at times maybe excite them or deeply move them but the stories of the silmarillion and the lord of the rings contain deeper teachings that can only be drawn out when read philosophically written from the vantage of a mind that is deeply christian tolkien s stories grant us a revelatory gaze into the major political problems of modernity from individualism to totalitarianism sovereignty to surveillance terror to technocracy as an outsider in modernity tolkien invites us to question the modern in a manner that moves beyond reaction into a vivid and compelling vision of the common good
