this palgrave pivot uses modeling from microeconomic theory and industrial organization to demonstrate how consumers and producers have responded to major changes in the music industry byun examines the important role of technology in changing its structure particularly as new methods of creating and accessing music prove to be a double edged sword for creators and producers an underlying theme in the project is the question of how the business of music affects creativity and how artists continue to produce creative output in the face of business pressures the erosion of copyright enforcement and rampant online piracy in addition to being a useful resource for economists interested in the music industry this approachable pivot is also ideal for business and music majors studying the effect of technology on their chosen fields

friedrich nietzsche 1844 1900 supported the unification of europe and reflected on this like few other philosophers before or after him many of his works are concerned with the present state and future of european culture and humanity resisting the nationalist nonsense and politics of dissolution of his day he advocated the birth of good europeans i e supra national individuals and the amalgamation of nations nietzsche wagner europe analyzes the development of friedrich nietzsche s ideal of european culture based on his musical aesthetics it does so against the background of contemporary searches for a wider cultural meaning beyond europe s economic political union the book claims that nietzsche always propagated the aestheticization of europe but that his view on how to achieve this changed as a result of his dramatically altering philosophy of music the main focus is on nietzsche s passion for and later aversion to wagner s music and in direct connection with this his surprising embrace of italian operas as new forms of dionysian music and of goethe as a model of good europeanism
