classifying triangles quadrilaterals volume of rectangular prisms in

chapter 5 we study graphing in the coordinate grid line graphs and average today s world has become increasingly complex with lots of data presented in the media so our children need a good grasp of statistical graphs to be able to make sense of all of that information chapter 6 continues our study of decimals the focus is on multiplying decimals by decimals dividing decimals by decimals and conversions between measuring units chapter 7 covers the addition and subtraction of fractions another topic of focus for 5th grade besides decimals the most difficult topic of this chapter is adding and subtracting unlike fractions which is done by first converting them to equivalent fractions with a common denominator in chapter 8 we study the multiplication and division of fractions from various angles chapter 9 takes us to geometry starting with a review of angles and polygons from there students will learn to draw circles to classify triangles and quadrilaterals and the concept of volume in the context of right rectangular prisms boxes please note this is the student worktext and does not contain the answers the answer key book is available separately
